

HOW TO PLANT BULBS

September and October are the optimum times for bulb planting!

- Hole needs to be twice as deep as the bulb is tall. *If planting a bulb that's 2 inches, the hole needs to be 4 inches deep.*
- Dig straight down so bulb can stand up straight and you install all the way to the side of the hole.
- Be sure to plant bulbs Pointy side UP! If you cannot tell, place on its side.
- Sprinkle cayenne pepper on top of the soil to deter squirrels from digging.
